PROFILE

Database Administrator with nearly 2 years of experience managing and maintaining relational databases across product and financial-advisory environments. Skilled in SQL query optimization, backup and recovery, user access management, and performance tuning, with hands-on exposure to API testing (Postman) and cloud monitoring (AWS CloudWatch, Datadog). Currently building automation skills in Python. Strong understanding of database security practices, with a track record of supporting reliable, scalable business applications.

EXPERIENCE

Database Administrator

One Portfolio Advisory Pvt Ltd, Mumbai | **Sept 2025 – Present**

- Manage and maintain relational databases for a Mumbai-based financial advisory firm, ensuring data integrity, security, and availability.
- Write and optimize complex SQL queries for reporting, data analysis, and day-to-day business operations.
- Use Postman to test and validate API endpoints connecting database services with internal applications.
- Monitor database and infrastructure performance using AWS CloudWatch and Datadog, identifying and resolving issues proactively.
- Manage user accounts, roles, and access permissions to safeguard sensitive financial data.
- Building Python scripts to automate routine database maintenance and reporting tasks (in progress).
- Support backup, restore, and disaster recovery processes to minimize downtime risk.

Junior Database Administrator

Adinid Digital Automation Pvt Ltd, Faridabad | **Aug 2024 – Sept 2025**

- Installed, configured, and maintained MySQL databases using MySQL Workbench.
- Designed and maintained stored procedures, functions, and triggers to automate recurring database processes.
- Wrote and optimized complex SQL queries, joins, subqueries, and transactions to support business requirements.
- Created and managed views, indexes, and constraints to maintain data accuracy and improve performance.
- Performed DDL, DML, DQL, DCL, and TCL operations (CREATE, ALTER, DROP, INSERT, UPDATE, DELETE, SELECT, GRANT, REVOKE, COMMIT, ROLLBACK) as part of daily operations.
- Migrated and transformed data between databases, and assisted with upgrades and patching.
- Developed and maintained backup scripts, and handled database restoration when required.
- Collaborated with developers to integrate database logic into applications and maintained process documentation.
